HTML, CSS, Git

David Ramírez Contreras

Environmental Engineer · Automation Engineer & Developer

Bogotá, Distrito Capital, Colombia

Summary

Environmental engineer turned automation engineer, blending an analytical, systems-driven mindset with modern automation and AI tooling. I design n8n pipelines, ship Claude Code agents, wire APIs and webhooks, and turn messy CSVs into clean Supabase data. Background in Environmental Management Systems (ISO 14001) and continuous-improvement programs (PREAD). Entrepreneur by nature — currently CEO of Entre Peces while building automation solutions as a freelance developer at Forgentic.

Experience

Forgentic

Automation Engineer & Developer

Freelance · 2025 — Present

Remote

Design and ship end-to-end automation workflows in n8n: webhooks, scheduled jobs, and data sync between SaaS tools and internal databases.

Build AI agents and pipelines with Claude Code, integrating Anthropic APIs, custom tools, and MCP servers for business automation.

Process and transform large CSV datasets (cleaning, dedup, enrichment) and load them into Supabase via SQL and edge functions.

Implement REST APIs and webhook integrations (Meta, MailChimp, payment gateways) to connect marketing, sales, and inventory systems.

Quality assurance and continuous improvement on production automation flows.

3R Importaciones SAS

Administrative Assistant

March 2025 — March 2026 · 1 yr 1 mo

Bogotá, Colombia

Implemented organic digital marketing strategies and automated content publishing workflows.
